

## **Course Outline:**

How to set goals and achieve them

half day classroom course – 0900am to 1300pm

This is an interactive course on understanding how to set and achieve goals. Where this is held for organisations, their goals or project goals can be used as the exercises for delegates to undertake.

The course will discuss new science and researches of some of the models that will be used on the project.

Many organisations who undertake projects, forget that the essence of the project apart from the realisation of useful benefits, is to achieve goals. The focus therefore becomes the application of more tools rather than understanding what it takes to achieve goals.

### **Learning Objectives:**

- Psychological Models on how the mind works
- The pillars behind successful goal setting
- Setting the right Goals
- Pyramid of goal setting
- How to tie in your individual team members life goals to organisation goals to increase the success rate
- Developing the plan to achieve the goal
- Success factors for achieving the goals

This course is also tailored for individuals looking to achieve their own goals when not undertaken specifically for project organisations

Instructor: Clement Kwegyir-Afful BSc MSc CEng FICE MAPM.

The Instructor is an experienced project manager who has delivered award winning projects and also turned around struggling projects and set them up for success. Some of the projects he has worked on includes HS2, Hinkley Point C and Reading Station Area Redevelopment Project.

Apart from receiving awards with his projects, the tutor has also published a book on project management, received commendation from government organisations (HE) and a thank you letter from a former UK Prime Minister.

The instructor consults for large infrastructure projects and government organisations in the UK and overseas.
